# On-chain risk metrics for DeFi & Telegram

QuickScan gives near-instant risk signals, LP & holders analysis, admin privileges, and domain checks (WHOIS / SSL / Wayback). Deeper scans and shareable HTML reports are available on demand.

## Key Features

- Δ Buttons 5m / 1h / 6h / 24h
- Liquidity & top-holders concentration
- Admin & proxy contract flags
- Domain: WHOIS, SSL, Wayback snapshots
- Shareable HTML report, copy-CA, open in Scan/DEX
- **Watchlist & Alerts (lite)**: opt-in alerts on price deltas, liquidity movements, holder/LP-lock changes, and high-impact flags.

## Why It Matters

- Faster screening for traders & Telegram admins
- Reduce scam exposure with automated checks
- White-label for channels & launchpads

## Plans (indicative)

- Day-Pass — $9
- Pro — $29/mo
- Teams — $99/mo
- Deep Report — from $3

## Tech & Integrations

- Multi-chain (ETH / BSC / Polygon)
- DexScreener, explorers, WHOIS/SSL APIs
- Render + Cloudflare Worker proxy
